15 **Description of Equipment or Protective System**

The **Wolflite Handlamp H-251A** is a portable light with a moulded anti-static plastic case and lens ring, and a toughened glass lens. The lens is sealed to the lens ring and the lens ring is sealed to the case by nitrile, neoprene or EPDM O-rings/seals. The lens ring screws onto the body and as an option may be locked in place by a socket head lock screw. The lock screw prevents switch slider mechanism operation until the lens ring is locked in place.

The impact resistant enclosure provides an ingress protection rating of IP66.

The switch slider mechanism contains a magnet which operates an internal hermetically sealed reed switch.

Power is provided by means of a rechargeable battery pack containing two sealed lead acid cells and an active current limiting device. Two metal studs passing through the wall of the enclosure allow the torch to be placed on charging apparatus with connections aligning with the two studs. The studs align internally with the battery pack connections. The studs are sealed to the wall of enclosure and maintain the ingress protection provided by it..

A 3.6 volt (minimum) 1.0 amp (maximum) bulb is used. Alternatively a 3.75 volt (minimum) 0.75 amp (maximum) halogen bulb type HPR may be used.
