

The ELSPRO FOKUS LED P160 is a high-quality USB battery hand lamp for everyday use. Due to the sturdy T6 aircraft aluminum housing, the focusing system and the extremely powerful CREE LED the FOKUS LED P160 is the ideal hand lamp for spontaneous use.

The hand lamp can be charged via a micro USB port. The sophisticated design allows to use the battery also as a power bank. Both the charging of the battery as well as a low battery level are indicated by blue LEDs next to the (micro-) USB ports.

By using the lamp with a battery holder and 3 AAA size alkaline batteries the ELSPRO FOKUS LED P160 can also be operated as a battery light.

FEATURES AND CHARACTERISTICS:

- Compact housing made of anodized T6 aircraft aluminium
- Protection class IP54
- Focusable light cone
- Very high light output due to CREE LED
- Environmentally friendly and durable Li-Ion battery
- Multifunctional switch on the end cap, with magnet
- LEDs next to the micro USB port indicate charging status and low battery capacity
- Rechargeable battery can be used as a power bank
- Delivery includes: USB charging cable, power bank, battery holder without batteries, holster and hand strap - all packed in black gift box
