ELSPRO®

QUALITY BY GERMANY — ELSPRO®

CONSULTING · PLANNING · PRODUCTION · SERVICE

INNOVATION · QUALITY · SERVICE
Our basics

Your Partner in the Industry

Since 1986 ELSPRO Elektrotechnik GmbH & Co. KG has been synonymous with high quality and outstanding service in the electricity and lighting sectors. We supply industrial and service clients with an extensive range of innovative electrotechnical safety products.

Tailor-made Solutions

Our specialists implement all customer requirements, if technically feasible. Flexibility and maturity in production processes, which are demand-synchronized, allow us to deliver even tailor-made solutions quickly.
Technology without Compromise

We implement the product requirements of our customers in compliance with the latest technical regulations. Our benchmark is state-of-the-art technology.

Made in Germany

At our headquarter in Hilden, we use the advantages of the neighbouring state capital Düsseldorf in terms of service and logistics. From here we can reach the entire European market quickly and cost-efficiently.

Partner to these industries

▶ Energy generation

▶ Public utilities · Power plants

▶ Traffic organisations

▶ Emergency and rescue services

▶ Construction companies · Assembly

▶ Metal working

▶ Paper manufacturing and wood processing

▶ Chemical industry

▶ Food industry

▶ Automotive industry

▶ Water treatment

▶ Shipyards · Plant engineering

Industrial Tripods
ELSPRO Industrial Tripods and Special Mounting Supports

Symbol	Explanation	Symbol	Explanation
	height when folded		diameter of the maximum standing area
	maximum height when erected		maximum load capacity of the tripod
	minimum height when erected		weight of the tripod alone

CLT Locking Mechanism

uniform all-around clamping of the tripod post

Shock Absorber

pneumatic design for air-cushioned lowering

13.0

ELSPRO INDUSTRIESTATIV Typ THW

FEATURES AND QUALITIES:

- stainless steel construction
- pole diameters of 50/45/40/35 mm, thickness 1.5 mm
- 3 blocking systems of aluminum with all-around clamping, captive grips and with integrated QUAD rings to prevent water penetrating the blocking systems
- support tube of square profile tubing with a special folding mechanism
- stabilizing leg adjustable with push slider, captive grip
- shock absorber: pneumatic design for air-cushioned lowering
- connection end with ø 30 mm DIN pins as per DIN 14640
- supporting legs with ø 80 mm base plates and pins
- fastening set, anchoring set and double cross-bars optional

THW ARTICLE NUMBER: 6230T22410

AUSFÜHRUNGEN:

Type	Frame*						Kg.	Order No.
THW	SS	145 cm	480 cm	145 cm	160 cm	20,0 kg	18,0 kg	**TW7840SA**

*Material: **SS** = Stainless steel

When folded the tripod has a length of 145 cm and is held together by the lashing strap delivered with the tripod.

The triangular fastening plate for attaching the caribiner hooks of the guy ropes is attached directly under the DIN pin.

For secure positioning, possible unevenness can be leveled out with the help of the leveling elements.

– other models on request / subject to modification and errors –

ELSPRO Industrial Tripod Type THW

THW – article number: 6230T22397

COMPONENTS AND ACCESSORIES   Order No.

ELSPRO – FASTENING SET   **TW-AS750X3**

consisting of each 3 x:

- 7.5 m polyamide – fastening rope Ø 4 mm
  as per DIN EN ISO 1140, color: white
- 1 carabiner as per DIN 5299–C80
- 1 ring, high-gloss galvanized, A 40 x 5,
  as per DIN 5296
- 1 rope thimble as per DIN 6899
- 2 wire rope clamps, oval
- 1 adjustment element, galvanized,
  for adjusting the rope length

THW – article number: 6230T22398

ELSPRO - Ground Anchoring Set   **TW-EA400**

3 x ground anchors:

- 400 mm long, hot-dip galvanized

Cross bar including basic mounting support
and DIN pins

ELSPRO - Double Cross Bars

Double cross bars consisting of:

- basic mounting bracket/support including star grip
  for attaching to the tripod
- 2 x stainless steel DIN pins ø 30 mm
- 1 x stainless steel C-profile rail

  - Length 450 mm   **TV045**
  - Length 600 mm   **TV060**

13.2

ELSPRO TRIPOD FIRE DEPARTMENT Type IFW 2.0

FEATURES AND QUALITIES:

- is according to DIN 14682 („Tall tripod - Collapsible with fixed pivot pin") and thus maintains the room dimensions of max. 20 cm when stored
- stainless steel construction aisi 304 - no corrosion
- downpipes Ø 50/45/40/35 mm, thickness 1.5 mm for stability and longevity
- 3 blocking systems of aluminum with clamping
- supporting legs can be individually extended up to a maximum of 0.58 m - clamping of supporting legs with blocking system of red aluminium - safe standing by compensating for unevenness on the standing surface
- shock absorber: pneumatic design for air-cushioned lowering - controlled lowering of the tripod load
- equipped with hand protection gap on telescopic parts
- connection end with ø 30 mm DIN pins as per DIN 14640
- supporting legs with ø 80 mm base plates and pins
- fastening set, anchoring set and double cross-bars optional

MODELS:

Type	Frame*						Kg.	Order-No.
IFW 2.0	SS	114 cm	415 cm	114 cm	160 cm	20.0 kg	15.4 kg	TV7845SA

*Material: **SS** = Stainless steel

When folded the tripod has a length of 114 cm and is held together by the lashing strap delivered with the tripod.

The triangular fastening plate for attaching the caribiner hooks of the guy ropes is attached directly under the DIN pin.

For secure positioning all 3 supporting legs can be leveled individually on the standing surface and any unevenness can be compensated.

– other models on request / subject to modification and errors –

    - Length 600 mm **TV060**

– other models on request / subject to modification and errors –

ELSPRO Industrial Tripods BETA Series

more than a tripod

FEATURES AND QUALITIES:

- models in black-anodized aluminum or galvanized steel
- tube diameters: 45/38/32 mm
- CLT-locking device (uniform all-around clamping of the tripod tubes)
- standing tube of square profile tubing with folding mechanism
- shock absorber: pneumatic design for air-cushioned lowering
- equipped with hand protection gap on telescopic parts
- anchoring mechanism optional
- connecting end with ø 30 mm DIN pins
- including aluminum foot set with groove profile in black

MODELS:

Type	Frame*	▯	⟁	⟁	⊗	⟁ **	Kg.	Order No.
BETA 1	AL	176 cm	412 cm	150 cm	176 cm	22/30 kg	8.6 kg	**TV7501SA**
BETA 1	CS	176 cm	412 cm	150 cm	176 cm	27/35 kg	16.8 kg	**TV7502SA**
BETA 2	AL	140 cm	332 cm	123 cm	128 cm	24/32 kg	7.3 kg	**TV7511SA**
BETA 2	CS	140 cm	332 cm	123 cm	128 cm	29/37 kg	13.3 kg	**TV7512SA**

BETA 3	CS	114 cm	252 cm	96 cm	114 cm	31/39 kg	10.8 kg	**TV7522SA**

* Material: **AL** = aluminum, black anodized; **CS** = steel, black galvanized; **CSW** = steel, white chrome-plated (on request)
** The maximum permissible load capacity decreases depending on the height used: max. load capacity at max./min. extended tripod.

Components and Accessories: Order No.

Wheel set (ø 100 mm) with double brake and adapter in black aluminum

for ELSPRO industrial tripod BETA 1 + 2   **TV7505**
for ELSPRO industrial tripod BETA 3   **TV7506**

It is possible to attach up to 4 panel lights to the BETA industrial tripod without impairing the standing stability.

The shock absorber provides additional protection since it slows down the lowering of the tripod.

Fastening Set consisting of:

- triangular fastening plate V2A
- 3x fastening rope
- 3x ground anchors

Order-No.

Machine Lamps

ELSPRO®

ALED Z1

ALED Z1

LED Workplace Lamps - dimmable
SPECIAL FEATURES:

- Dimmable output levels
- Standard colour temperature 5,000 Kelvin, optional 2,700 Kelvin
- Reflectors with different beam angles: 12° / 28° / 66°

- Clear or satinised front glass made of hardened glass

- Portable versions with spiral kink protection and special cable INDUSTRIEFLEX® 07 HT
- Protection class IP 65
- Protection class 2 (230 V) or protection class 3 (safety extra low voltage)
- Turn-tilt joint made of diecast aluminium on the lamp head
- Handle on lamp head for directing the light
- Replaceable high-power LED Nichia COB
- Large cooling ribs
- Various models I / II / III / IV / V
- Portable and stationary variants
- Connection housing made of glassfibre-reinforced polyamide PA6
- Portable versions fitted with permanent magnets
- On-off pushbutton including dimming function on lamp head
- $R_a = 83$
- Dimming function

→ 0 lm up to 2,900 lm total luminous flux
→ Daylight white or warm white
→ Light beam focused according to requirements, the reflector can be changed without tools if required

→ Focused or diffused light, can be changed also without tools

→ Robust cable routing with premium cable, for high mechanical loads
→ Dustproof and water-jet-proof
→ Personnel protection at the highest level

→ High-precision direction of the light, right where it is needed
→ Simple handling
→ Future-proof replacement possible
→ Optimum heat dissipation
→ The right version for every application

→ Robust, impact-resistant design

→ Extra strong attachment force
→ Handy with good haptics

→ High colour rendering index
→ High flexibility in light intensity

The ribbed structure ensures optimal heat dissipation. The maximum temperature of the housing is therefore 60°C.

Variable models, e.g., particularly small and compact one, are possible. At 10 bo 30 V AC/DC, an additional power supply unit is required since there is a LED driver with an integrated constant current source in the lamp base.

Swivel joint 350°

Connector housing made of polyamide: series III with switch on housing, series IV without switch

Art. No..: 7801980

- light source unit consists of a special aluminum heat sink with an inserted 3 watt LED positioned behind an aspheric glass lens
- insulated connection housing of polyamide, 30% fiberglass-reinforced

- the 230V power supply unit is protected on the secondary side against short circuiting as well as against overload and thermal overload
- max. power consumption of of 5 watts

- the lamp base is made of die-cast aluminum

- the special ribbed structure ensures optimal heat dissipation
- protection class up to max. IP 65

- lamp head diameter of only 55 mm, depth 47 mm

→ the LED has a service life of 20,000 hours and projects a bright, homogeneous working light

→ optimal protection of the power supply unit in the case of mechanical stress

→ guarantees the required stable DC power supply to the lamp, NO STROBOSCOPE EFFECT

→ low energy input = low transformer output in the safety extra low voltage range (42 V) required

→ unbreakable, shock- and impact-resistant, long service life, COST SAVINGS

→ the lamp head does not get hot even if operated continuously, NO BURNS

→ SAFETY and function even if used in extremely wet areas and high exposure to dust

→ maximum light output with low space requirements
– other models on request / subject to modification and errors –

GOOD LIGHTING – an investment that pays off

Know the feeling? You have had a good night's sleep and actually feel ready to start your day. Yet, when you look out the window at the dull, grey sky, your mood drops. Simultaneously, you feel tiredness creeping into your bones – and the urge to return to bed.

A perfectly normal reaction. This is because we need bright daylight to be active, productive and motivated. This is particularly true to the workplace, where concentration and attention are essential factors that determine efficiency and, as such, the quality of the results.

Therefore, and not only to meet the requirements of the standard, investing in optimal lighting at the workplace is worth your while – already from the very first second!

Interrelationship between light and performance at the workplace

Challenging activity

Simple activity

Relative increase in performance

Illuminance (lx)
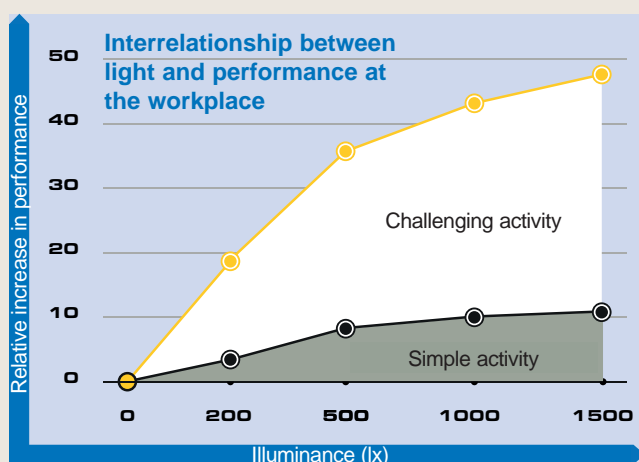

THE RIGHT LIGHTING and the factors that characterise it

Optimal lighting has an effect, both on a physical and psychological level. Not only does it brighten the room but it also improves the mood of the people working in it.

General and targeted lighting
Ceiling lights provide the basis for a balanced brightness. In addition, an extra source of light is required at the workplace to avoid fatigue and concentration lapses. This is where our LED workbench lights come into their own.

Illuminance and glare-free environment
The lighting intensity as well as the avoidance of reflections and mirroring is crucial to ensure good vision and performance at the workplace, since contrasts and details are clearly visible, and concentrated work is possible over a longer period of time. The ELSPRO LED workbench luminaires exceeds the standards as specified in DIN EN 12464-1 for the lighting level at workplaces.

Light quality and light modulation
An optimised ratio of the factors light colour, light direction and individually-adjusted brightness distribution contribute to determining visual comfort, well-being, precision, and productivity at work. Light colours around 5,000 K, which come close to natural daylight, are ideal for work areas.

Energy efficiency
LED lights are currently the most efficient light sources. They consume up to 90% less energy than conventional light sources. Unlike conventional light sources, the LED lights that shine downwards emit all their light in one direction, meaning that none of it is lost in the housing. LED lighting saves so much energy that a conversion can pay for itself in less than two years.

Light distribution of ELSPRO LED workbench lights

LED workbench light power   LED workbench luminaire grid
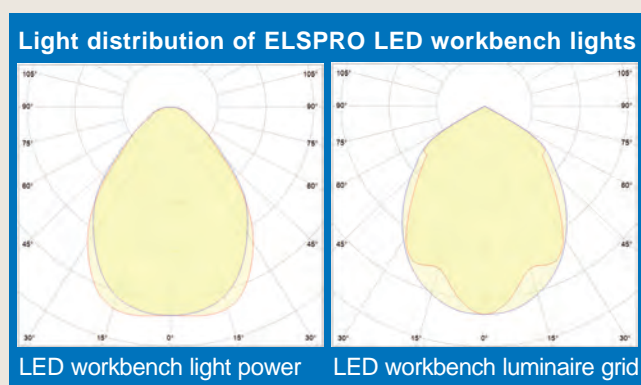

AVAILABLE IN ADDITIONAL VERSIONS:

- Tunable White
- App Connect

Brightness dimmable
With our dimmable product variants, you can flexibly adjust the brightness of the LED lighting and make optimal use of daylight.

Sense Remote
Our Sense Remote products feature programmable motion sensors and daylight sensors, as well as shutters that limit motion detection. They are dimmable via an IR remote control.

Tunable White
Our Tunable White option allows you to adjust the colour temperature of the LED lighting from 2,700 Kelvin (warm white) to 6,500 Kelvin (cool white).

App Connect
Our App Connect luminaires can be programmed and controlled via mobile device app using a smartphone or tablet. This way, you can regulate and control our lighting systems wirelessly.

LED Protection Tube Lamps
LED Machine Lamps
Protection Tube Lamps

SPECIAL FEATURES and ACCESSORIES:

Transparent **borosilicate glass** protection tube, 5 mm wall thickness, in 60 mm diameter
- particularly suitable when working with solvents, acids, and organic compounds
- no damage in the case of flying sparks and similar influences
- the particularly good translucence is long-lasting
- impurities on the surface can be removed easily
- protection tube is resistant to cold water and heat
- 70 mm tube diameter on request

Transparent **methacrylate** protection tube, 5 mm wall thickness, in 60 mm diameter
- good mechanical properties
- resistant to oils, fats, and acids
- 70 mm tube diameter on request

Transparent **polycarbonate** protection tube, 1.5 mm wall thickness, in 50 mm diameter
- polycarbonate is the right choice in the case of mechanical loads,
- the low outer diameter of only 50 mm is an advantage in the case of limited available space

Side fasteners of polyamide, glass-fiber-reinforced, with seals of oil resistant rubber NBR, 42SH
- the side parts seal the lamps dust and water-pressure-tight, IP67
- the fastening screws are made of stainless steel
SEF0023 SEF0022
ACCESSORIES: | Order No.

Assembly clip for tube Ø 60 mm
with fastening angle 60 mm | **SEF0023**

Assembly clip for tube Ø 60 mm
with fastening angle 45 mm | **SEF0022**

Assembly clip for tube Ø 60 mm | **SEF0024**
- clamping range 60 - 65 mm
- Material: polyamide
- Colour: light grey

Assembly clip for tube Ø 50 mm | **SEF0013**
- clamping range 50 - 55 mm
- Material: polyamide
- Colour: light grey

ELSPRO LED Protected Tube Light

SPECIAL FEATURES:

- IP67 – dust- and watertight
- mid-power LEDs provide white, concentrated glare-free illumination
- very low generation of heat

- the LEDs are vibration resistant and have a life expectancy of up to 50,000 hours

- an integrated LED driver supplies the LEDs with constant power long-term in DC operation
- colour temperature 5.500 K (*SLPG523/SLPW523: 6.500 K)

→ SAFETY also when used in extremely wet areas

→ ideal for lighting at close range

→ no danger of injury from burns in the case of direct physical contact or direkt contact with the lamp

→ a sudden total loss of diodes is nearly impossible. Even at the end of operating life, the light does not go out completely. This quality means a high degree of OPERATIONAL RELIABILITY

→ this ensures an extremely long operating life with optimal lighting performance

→ similar to daylight

assembled connecting cables on demand

* The following combinations are technically not possible: DIMMABLE and CONNECTING IN SERIES

– other models on request / subject to modification and errors –

SPECIAL FEATURES:

- Lamp body manufactured from black-anodised extruded aluminium profile EN AW 6060 T66
- Side parts for attaching brackets are manufactured in diecast aluminium with baked PTFE coating
- 4 mm hardened front glass with spray-on, oil-resistant seal for standard
- Polycarbonate (coloured) front glass available
- Diffuser, WN670
- Low-loss electronic LED driver
- Colour temperature 5,000 Kelvin
- Ingress protection type IP 67
- Standard: 4-pole input with panel-mount connector 12A / M12 plug-in connector system
- Protection class 1 (230 V) or protection class 3 (safety extra low voltage)
- Beam angle of 60°/120° and 100°/100° available
- Versions with 1 LED panel oder 2 LED panels
- Ambient temperature -25°C to +40°C
- Special-purpose solutions

- Models for different application areas, ask for your solution!

→ Enclosed, therefore very strong housing. Large surface area for efficient heat management
→ Side parts with spray-on foam seal make the profile dust and waterproof
→ Resistant to swarf and sparks, dust and waterproof
→ Break-proof, suitable for food industry
→ For a homogeneous distribution of light
→ High efficiency, low energy costs
→ Daylight white
→ Dust and waterproof
→ Coded plug-in connector system with high protection type
→ Excellent personnel protection

→ Individually configurable
→ For various light intensity
→ Suitable for different temperatures
→ For example:
  - dimmable via DALI control
  - dimmable via potentiometer
  - for connecting in series
→ Different application areas, e.g.:
  - Ceiling lights
  - Wall lights
  - Pendant lamp
  - Machine lamp
  - Workplace lamp
  - In wet areas
  - High-bay luminaire
  - Wire rope lamp
  - Food industry

FEATURES:

- 32 / 64 / 128 x NICHIA 757 LEDs
- Colour temperature 5,500 K
- Beam angle 120
- Lifetime of at least 50,000 hours
- Housing made of aluminium (solid material) and front pane made of acrylic glass
- Direct mounting or mounting by means of magnet sets, either flat or with tilting joints
- IP 67
- low overall height of only 18 mm

- Protection class 3

→ high luminous efficacy and uniform light pattern
→ daylight white
→ large beam angle with uniform illumination
→ proven durability
→ high quality and robust, reliable use under extreme conditions
→ easy installation in machines and production lines
→ dustproof and waterproof
→ Easy installation even in very tight spaces and installation locations
→ Protecting personnel at the highest level

- other versions on request / subject to change and error -

Spotlights and floodlights

ELSPRO®

MILAN

ELSPRO® **S** PREMIUM

LED Spotlights
MILAN

Save costs	Save time	Increased safety

5mm tempered safety glass with UV filter
Prevents blue light from escaping
• Protects people and animals
• Protects insects

Flexible mounting
Thanks to robust mounting bracket, inclination from -120° to +120° can be adjusted optionally as a mobile luminaire with a tripod holder for DIN spigots in accordance with DIN 14640

Highly efficient **Zhaga Standard (Book 15)** LEDs with 156 L/W.
Power Factor > 0.98

Plastic powder-coated aluminium die-cast housing (colour RAL 9022) robust, weatherproof and corrosion-resistant
Impact resistance IK10
Resistant to mechanical stress, such as heavy hail

Pressure equalisation valve
Prevents condensation and maintain IP tightness

Multifunctional high-tech LED driver dimmable with DALI-2-Standard

Surge protection 20 kA (10 kV) - protects against costly failures

Automatic mains interruption
When opening the housing*

Degree of protection IP66
Dust-proof and protected against strong water splashes from all directions

Two-zone concept
(Two chambers for LED module and driver) for optimal thermal management

Aerodynamic design
• Low contamination due to smooth surface
• No cooling fins are necessary for heat dissipation

Beam angle Asymmetric (A4)
Excellent and uniform surface illumination

* For EML250 and EML460

– Further models, accessories and spare parts on request / subject to change and error –

SPECIAL FEATURES:

- **LED life L90B10 > 100,000 hours**
  Driver life < 70°C = 100,000 hours
- **Up to 156 lumens/watt** (154 – 155 – 156 – 155)

- Modular concept

- Outstanding price/performance ratio (lm/€)
- 36, 48, 96 or 168 high power LEDs type 5050
- Ambient temperature -35°C to +50°C.
- Highly resistant to 5G vibration
- Luminosity class G6 and
  Upward Light Ratio (ULR) = 0%
- Photobiological safety class RG0
  (No risk)
- Protection class 1
- Colour Rendering Index (CRI) > 70
- Light-weight, only 4.2 / 8.2 / 12.1 or 19.8 kg

→ Outstanding, proven durability

→ Highly efficient LED technology: High luminous efficiency with low energy consumption – one of the most powerful and efficient LED spotlights on the market

→ Future-proof and sustainable thanks to easy-to-replace luminaire components (LEDs, drivers, lens optics, safety glass)

→ Low payback times
→ Homogeneous light image
→ Use even with large temperature fluctuations

→ No light emissions in the upper half-space and therefore no light pollution

→ Maximum safety for the user

→ Easy installation and maintenance

– Further models on request / subject to change and error –

SPECIAL FEATURES:

❶ **110° version:** High-performance LED module with 228 nodes evenly distributed on a large area and a 110° beam angle produces a homogeneous light pattern

❷ **60° version:** 24 high-performance LEDs with supplementary lenses and a 60° beam angle produces a focused light pattern

● Colour temperature: 5,000 K

● Ambient temperature: **-30 °C to +55 °C**

● Ingress protection type: **IP66**

● Connection is by a flexible cable (approx. 50 cm) with jacketed ends

● Mains adapter and driver are fitted in an extra housing on the bracket for easy mounting

● The low weight of only 4.2 kg and strong mounting bracket allows for easy and reliable ceiling or wall mounting An additional safety wire with karabiner hook is included

→ Perfect for providing even illumination of areas

→ For providing focused illumination of areas from a great height

→ Daylight white

→ Can be used indoors and outdoors, even under large temperature fluctuations

→ Proof against dust entry and protected against for powerful water jets

→ No negative interactions due to heating up

→ protection - safety

– Other versions on request / subject to changes, E&OE –

SPACEJET 80 110°
ELSPRO LED Floodlight

$C\epsilon$ **IP66**

VERSIONS:

Voltage	Output	Lumen	R$_a$	Dimensions	Weight	Order No.
100 - 240 V AC 50 / 60 Hz	max. 80 W	12,000 **150 lm / W**	≥ 80	Ø: 378.2 mm H: 191.5 mm (Including bracket)	9.1 kg	**ESJ080110**

SPECIAL FEATURES:

- High-performance LED modules with 288 nodes evenly distributed on a large area and a 110° beam angle produces a homogeneous light pattern

- Colour temperature: 5,000 K

- Ambient temperature: **-20 °C to +55 °C**

- Ingress protection type: **IP66**

- Mains adapter and driver are fitted in an extra housing on the floodlight housing for easy mounting

- Diecast aluminium housing with **special paint**

- High number of cooling ribs

- The low weight of only 9.1 kg (aluminium housing) and strong mounting bracket including eye-bolts allows for easy and reliable ceiling or wall mounting An additional safety wires with karabiner hooks are included

- Connection is by a flexible cable with jacketed ends

→ Perfect for providing even illumination of areas

→ Similar to daylight

→ Can be used indoors and outdoors, even under large temperature fluctuations

→ Proof against dust entry and protected against for powerful water jets

→ No negative interactions due to heating up

→ Optimised reduction of dust deposits on the surface

→ Excellent heat management - designed for long LED service life of up to 50,000 hours - COST SAVING

→ Double protection - double safety

LED floodlight with DALI control unit
SPACEJET HT 120 110°

IP66 CE

CONFIGURATIONS:

Voltage	Power	Luminous flux	Colour temperature	Dimensions (H x Ø)	Weight	Order no.
100 - 240 V AC 50 / 60 Hz	120 W	19.800 **165 lm / W**	5.000 K	233 x 380 mm (Including bracket)	6,3 kg	**ESJDHT120110**

SPECIAL FEATURES:

- Highly efficient Samsung LEDs with 243 light points evenly distributed over a large area and a beam angle of 110° create a homogeneous light image
- **LED lifespan L90B10 - 50,000 hours**
- LED driver with overheating and overvoltage protection
- Ambient temperature: **-30°C bis +80°C**
- Protection class: **IP 66**
- LED driver is housed in an extra housing on the spot-light housing for easy installation
- Die-cast aluminium housing **with special chromate powder coating**
- High number of cooling fins
- The low weight of only 6,3 kg (aluminium housing) and strong mounting bracket including eye-bolts allows for easy and reliable ceiling or wall mounting An additional safety wires with karabiner hooks are included.
- The connection is made via a flexible cable (80 cm) with stripped ends
- Power factor > 0,9
- Colour rendering index CRI ≥ 80
- Protection class 1
- Shock resistance IK 08
- with DALI control unit

→ Basis for the even illumination of surfaces

→ Cost savings

→ Can also be used with large temperature fluctuations indoors and outdoors

→ dustproof and protected against strong water jets

→ No negative interactions due to heating

→ Optimised reduction of dust deposits on the surface

→ Excellent heat management - prerequisite for the long service life of the LEDs of up to 50,000 hours - COST SAVINGS

→ Double protection - double safety

ELSPRO

LED floodlight with DALI control unit
SPACEJET HT 360 110°

IP66 CE

Light emission:

cd/klm   η = 100%
— C0 - C180   — C90 - C270

| 29 m | 20 LUX | 10 x 10 m |
31 m	18 LUX	12 x 12 m
33 m	15 LUX	14 x 14 m
35 m	14 LUX	16 x 16 m

Please note: The lux values shown are average values of the specified area without taking into account the reflection from walls, ceilings and floors. The real values may be higher.

Application example 12 SPACEJET HT 360 110°:

Room height:	35.00	m
Mounting height:	35.00	m
Maintenance factor:	0.80	
Usage level:	0.85	m
E_m:	269.00	Lux
g_1:	0.87	
17.28

09.25

LED floodlight with DALI control unit
SPACEJET HT 380 70°

IP66 CE

CONFIGURATIONS:

Voltage	Power	Luminous flux	Colour temperature	Dimensions (H x Ø)	Weight	Order no.
100 - 250 V AC / 130 - 250 V DC	380 W	60,200 **158 lm / W**	5,000 K	329 x 485 mm (incl. bracket)	13.7 kg	**ESJDHT380070**

SPECIAL FEATURES:

- Highly efficient Samsung LEDs with 288 light points evenly distributed over a large area and a beam angle of 70° create a homogeneous light image
- **LED lifespan L90B10 - 50,000 hours**
- LED driver with overheating and overvoltage protection
- Ambient temperature: **-30°C to +80°C**
- Protection class: **IP 66**
- LED driver is housed in an extra housing on the spotlight housing for easy installation
- Die-cast aluminium housing **with special chromate powder coating**
- High number of cooling fins
- The low weight of only 13.7 kg (aluminium housing) and strong mounting bracket including eye-bolts allows for easy and reliable ceiling or wall mounting An additional safety wires with carabiner hooks are included.
- The connection is made via a flexible cable (80 cm) with stripped ends
- Power factor > 0,9
- Colour rendering index CRI ≥ 80
- Protection class 1
- Shock resistance IK 08
- with DALI control unit

→ Basis for the focused illumination of areas from a great height

→ Cost savings

→ Can also be used with large temperature fluctuations indoors and outdoors

→ dustproof and protected against strong water jets

→ No negative interactions due to heating

→ Optimised reduction of dust deposits on the surface and excellent protection against corrosion

→ Excellent heat management - prerequisite for the long service life of the LEDs of up to 50,000 hours - COST SAVINGS

→ Double protection - double safety

09.25
Voltage	Output	Number of Poles	Cable Gland	Luminous Flux	Colour Temperature	Beam Angle	Length	Weight	Order No.
220 - 240 V AC	25 W	2 pole	M20	4,000 lm	4,000 K	110°/150°	1,200 mm	1.0 kg	KLF25
		3 pole							KLF25/3P
	38 W	2 pole		6,080 lm			1,600 mm	1.4 kg	KLF38
		3 pole							KLF38/3P
	58 W	2 pole		9,280 lm				1.6 kg	KLF58
		3 pole							KLF58/3P
		5 pole							KLF58/5P

SPECIAL FEATURES:

- **160 Lumen / Watt**

- color rendering index CRI > 80
- life-time: L90B10 > 50,000 hours
- protection class: IP 66
- housing made of polycarbonate

- ambient temperature: -30°C to +50°C
  (KLF58/5P: -30°C to +40°C)
- including two movable mounting clips with easy-click fixation made from stainless steel
- optional mounting clips with safety screws (Order No.: KLF/MKS)

- 2 pole and 3 pole through-wiring with connection terminal up to 2.5 mm² or
  5 pole through-wiring with connection terminal up to 1.5 mm²

- suitable to be used in companies of the food and beverages sector that are certified according to IFS version 8 and/or BRC Global Standard Food Version 9

→ highly efficient LED technology:
  high luminous efficacy with low energy consumption

→ designated long-life cycle
→ dustproof and water-jet-proof
→ IK10, impact-resistant (protection against impacts with an impact energy of up to 20 joules)
→ also suited for use when temperatures greatly fluctuate in both indoor and outdoor areas
→ convenient installation

→ anti-vandalism

→ number of linking luminaires per circuit depending on model (permanently installed)
  - KLF25 / KLF25/3P: up to 53 luminaires
  - KLF38 / KLF38/3P: up to 35 luminaires
  - KLF58 / KLF58/3P: up to 23 luminaires
  - KLF58/5P: up to 18 luminaires

- other models on request / subject to modification and errors -

09.25

ELSPRO LED linear light fitting type KLF with programmable motion/daylight sensors

CE IP66 ▽Ⓓ ▢
MODELS:

Voltage	Power	Number of poles	Screw connection	Luminous flux	R_a	Beam angle	Length	Weight	Order no.
220 - 240 V AC	45 W	3 pole	M20	5,600 lm	> 80	110°/127°	1,200 mm	1.5 kg	**KLF45/3P/DIM**

CONFIGURATIONS:

- up to 125 lm/W
- Colour temperature: 4,000 K
- Service life L90B10 (up to 50,000 hours)
- Protection class: IP66
- Polycarbonate housing

- Ambient temperature: -20°C to +40°C

- Including mounting clamps with stainless steel snap lock
- Mounting brackets including locking screws available as accessories (item no.: KLF/MKS)
- 3-pole through-wiring with a connection terminal up to 2.5 mm²
- including remote control for programming the motion and daylight sensors

- Variable programming possible via the remote control

- Suitable for use in food and beverage companies certified to IFS version 6 and/or BRC Global Standard Food version 7

→ high light output
→ similar to daylight
→ proven longevity
→ dustproof and resistant to powerful jets of water
→ IK10, mechanical resistance (protection against impacts up to 20 joules)
→ Can also be used with large temperature fluctuations indoors and outdoors
→ simple attachment

→ Protection against vandalism

→ up to 7 lights can be connected per circuit (permanently installed)
→ Factory presets:
100% sensitivity of the motion sensor,
100% light intensity for a period of 5 seconds,
then 25% light intensity for an unlimited period,
inactive daylight sensor
→ Motion sensor sensitivity: 25 / 50 / 75 / 100%
→ Duration of 100% light intensity after the movement ends:
5 sec. / 30 sec. / 3 min. / 30 min.
→ Duration of 25% light intensity until switching off:
0 sec. / 1 min. / 10 min. / + ∞ (unlimited duration)
→ Daylight sensor: 5 lx / 30 lx / 150 lx / deactivated

- other models on request / subject to modification and errors -

							EPL1200X300DALI

With our LED panels you can illuminate your rooms efficiently and sustainably. This allows you to reduce energy and maintenance costs and create a productive working environment.

SPECIAL FEATURES:

- 96 Backlit-LEDs

- luminous flux of 4,000 lm with 24 W powerconsumption

- colour temperature: 4,000 K - neutral white

- also available with dimmable power supply unit or driver with DALI standard

- highly low glare value of UGR < 18

- beam angle 120°

- **power customisable via DIP switch**

- standardised dimensions

- Power factor > 0.9

- CRI ≥ 80

- ambient temperature -20°C to +40°C

- LED panel with white aluminium frame

- impact-resistant diffuser disc made of polypropylene with special honeycomb structure

→ even light diffusion and uniform light pattern thanksto Backlit-Technology

→ luminous efficacy 167 lm / W

→ ideal as workplace lighting

→ individual brightness adjustment

→ Suitable for VDU workstations

→ excellent general lighting

→ individual adjustment of brightness

→ ideal for use in suspended ceilings

→ low power loss

→ high colourrendering index

→ optimum lightdistribution

* Optionally available as model with stainless steel clips and ambient temperature ≤+50°C   - Models with emergency power or dimming function on request -

SPECIAL FEATURES:

- High-power LED with up to 136 lm/W.
- Light colour 4,000 K.
- CRI +80
- Power factor 0.98
- Lifetime L80B10 TA30 - up to 70,000 hours
- Polycarbonate housing and cover

- Direct mounting via two mounting brackets (included) or alternatively two wall mounting brackets, suspension via chain or cable suspension or mounting for outriggers

- Cable gland M20
- Protection class I.
- IP 66
- Ambient temperature: -25°C≤T_a≤ see table

- Optionally with single-phase or three-phase through-wiring

→ High light output
→ Neutral white (2,700 K - 6,500 K on request)
→ High colour rendering index

→ Proven longevity
→ IK10, resistant to mechanical stress (protection against impacts with an impact energy of up to 20 joules)

→ Easy installation on the ceiling or wall of the room to be illuminated

→ Line diameter of 7-12 mm

→ Dust and splash protection
→ Use at elevated ambient temperatures and large temperature fluctuations

ELSPRO LED Lighting for Squares and Paths
Type WHIPLED 28 and 56 - Model 1

CE ◈ ⚠ ⚠ ⏚

MODELS:

Voltage	Output	Lumen	Dimensions	Weight	Color	Order No.
170 - 240 V AC 50 / 60 Hz	32 W	2,680	H: 330 mm W: 131 mm / W: 264 mm T: 255 mm	2.8 kg	light gray RAL7035	**EWL2328-1LG**
					gray DB703	**EWL2328-1GR**
	64 W	5,360		4.0 kg	light gray RAL7035	**EWL2356-1LG**
					gray DB703	**EWL2356-1GR**

SPECIAL FEATURES:

- 28 or 56 high-performance LEDs
- rated output 32 or 64 watts
- sturdy housing made of special aluminum alloy with mounting connectors
- large plastic-powder-coated heat sink

- angle of illumination: 160° with polycarbonate finish
- color temperature: 5,800 K
- ambient temperature: -20°C to +40°C

- protection class: IP65
- reduced weight of only 2.8 kg up to 4.1 kg

→ optimal light output, homogenous lighting
→ low energy costs
→ weatherproof, hard-wearing, long service life

→ outstanding thermal management due to the large number of cooling fins
→ excellent wide-area illumination
→ similar to daylight
→ also suited for use when temperatures greatly fluctuate in both indoor and outdoor areas
→ dust-tight and sprayproof
→ simple and secure wall mounting

– other models on request / subject to modification and errors -

MODEL 2:
- wall mounts and pole mount on page 18.03, please select and order fastening system separately -

Voltage	Output	Lumen	Dimensions	Weight	Color	Order No.
170 - 240 V AC 50 / 60 Hz	32 W	2,680	H: 195 mm W: 131 mm / W: 264 mm T: 610 mm	2.9 kg	light gray RAL7035	**EWL2328-2LG**

MODELS:

Voltage	Power	Luminous flux	Luminaires	Colour temperature	Dimensions (L x W x H)	Weight	Order no.
220 - 240 V AC 47 - 63 Hz	40 W	6,432 lm	LED panel 16 LEDs	4,000 K	530 220 283 x 128 mm	6.8 kg	**EFL40**
	80 W	12,760 lm	LED panel 32 LEDs		690 290 283 x 140 mm	8.5 kg	**EFL80**
	120 W	19,152 lm	LED panel 48 LEDs				**EFL120**

SPECIAL FEATURES:

- **LED life L90B10 > 100,000 hours**
  Driver life < 70°C = 100,000 hours

  → Outstanding, proven durability

- **160 lumens / watts**

  → Highly efficient LED technology: High luminous efficiency with low energy consumption – one of the most powerful and efficient street lights on the market

- Modular concept

  → Future-proof and sustainable thanks to easy-to-replace luminaire components (LEDs, drivers, lens optics, safety glass)

- Outstanding price/performance ratio (lm/€)

  → Low payback times

- 16, 32 or 48 high power LEDs type 5050

  → Homogeneous light image

- Ambient temperature -35°C to +50°C.

  → Use even with large temperature fluctuations

- Luminosity class G6 and Upward Light Ratio (ULR) = 0%

  → No light emissions in the upper half-space and therefore no light pollution

- Photobiological safety class RG0 (without risk)

  → Maximum safety for the user

- Protection class 1

- Colour Rendering Index (CRI) > 70

- The inclination of the luminaire can be individually adjusted from -15° to +15° as a pole-mounted luminaire

  → Optimal alignment of the light cone to the conditions on site

- Light-weight, only 6.8 or 8.5 kg

  → Easy installation and maintenance

– Further models on request / subject to change and error –

LED Street/Path & Plaza Light
FINLED

Save costs	Save time	Increased safety

Flexible mounting as top-mounted and top-mounted mast luminaires by means of swivelling nozzles - suitable for a mast diameter of 60 mm tilt adjustable from -15° to +15°

5mm tempered safety glass with UV filter
Prevents blue light from escaping
• Protects people and animals
• Protects insects

Highly efficient Zhaga Standard (Book 15) LEDs with 160 L/W. Power Factor > 0.98 Energy class A++ (IPEA>1.15)

Pressure equalisation valve
Prevents condensation and maintain IP tightness

Prepared for any intelligent light control and sensor technology - Fit for the future today

Plastic powder-coated aluminium die-cast housing (colour RAL 9022) robust, weatherproof and corrosion-resistant
Impact resistance IK10
Resistant to mechanical stress, such as heavy hail

A 33% increased cooling surface thanks to **patented fin design** ensures excellent heat management and thus increased efficiency (160lm/W) and very high LED life (L90B10 > 100,000 hours)
Aerodynamic design
• Low contamination due to smooth surface
• No cooling fins are necessary for heat dissipation

Elegant, slim design blends harmoniously into almost any environment

Beam angle 140° - Asymmetric Super Extensive (AE) Excellent and uniform surface illumination

– Further models on request / subject to change and error –

LED Street/Path & Plaza Light
FINLED

Save costs	Save time	Increased safety

Automatic mains interruption
When opening the housing

Multifunctional high-tech LED driver dimmable with DALI 2 standard

Surge protection 20 kA (10 kV) - protects against costly failures

Open without tools
Of the connection compartment by two locking clips
• Easy handling and easy connection of the luminaire
• Safe locking by eccentric system

Degree of protection IP66
Dust-proof and protected against strong jet water from all directions

Two-piece, removable luminaire housing
for comfortable and fast
Maintain all important components on the workbench or in a fixed maintenance position
→ Rapid, tool-free replacement

Two-zone concept
(Two chambers for LED module and driver) for optimal thermal management
– Further models on request / subject to change and error –

Mast holder 3 support bracket (EFL/M843)

EFL001   EFL002

Safety glass (EFL007)

LED board including lens (EFL008 / EFL009)
ACCESSORIES AND SPARE PARTS: Order no.

Mast holder for pipe diameter 67-80 mm
- Horizontal tilted by 0°
- incl. fittings (VA) M8 x 30 mm
- Stainless steel

- 1 support bracket L=150 mm x Ø=60 mm   **EFL/M841**
- 2 support bracket L=150 mm x Ø=60 mm   **EFL/M842**
- 3 support bracket L=150 mm x Ø=60 mm   **EFL/M843**
- 4 support bracket L=150 mm x Ø=60 mm   **EFL/M844**
Corner mounting for inner angle (90°)   **EFL001**
- Pipe dimensions (L x Ø): 120 x 60 mm
- Mounting plate dimensions: 200 x 160 mm
- Stainless steel V2A

Wall bracket (0°) and corner mounting for external angle (90°)   **EFL002**
- Pipe dimensions (L x Ø): 200 x 60 mm
- Mounting plate dimensions: 200 x 160 mm
- Stainless steel V2A

LED driver (not shown)
- Input voltage 230 V AC
- LED driver dimmable 1 - 10 V DC
- Continuous current 750 mA

- Nominal power 40 W.   **EFL003**
- Nominal power 80 W.   **EFL004**
- Nominal power 120 W.   **EFL005**

Safety glass (5 mm) with UV filter
- FINLED 40 W   **EFL006**
- FINLED 80 W / 120 W   **EFL007**

LED board including lens
- Light colour 4,000 K.
- Colour Rendering Index (CRI) > 70
- LED life L90B10 > 100,000 hours

- 8 LEDs   **EFL008**
- Total luminous flux 3,216 lm
- 16 LEDs   **EFL009**
- Total luminous flux 6,380 lm

OPTIONAL PROJECT FEATURES:

- Additional colour temperatures: PC Ambar, 2,200 K, 3,000 K and 5,000 K.
- with ZHAGA-connections for sensors
- IoT-ready (Ready4IoT), making it future-proof for versatile intelligent lighting control and sensor technology →
- Sensor-ready model (e.g. for motion or daylight sensors)
- Additional lens optics (PMMA lenses 2x2) for a wide range of beam angles
- Other services available
- Additional housing colours on request
- Colour Rendering Index (CRI) > 80
- Models with protection class 2

– Further models on request / subject to change and error –

ELSPRO N8LED 2.0
LED POST-TOP LUMINAIRE

MODELS:

Voltage	Output	Lumen	Dimensions	Weight	Color	Post diameter	Order No.
230 V AC +/- 10% 50 / 60 Hz	280 W	30.000	H: 90 mm Ø: 640 mm	18.0 kg	grey DB703	86 mm	N8GR2886
						76 mm	N8GR2876
						60 mm	N8GR2860

SPECIAL FEATURES:

- 8 LED modules with 27 LEDs each
- Rated power of 280 watts
- Robust plastic powder-coated aluminum housing

- Plastic power-coated heat sink

- LED modules supplied individually by drivers
- Modular design of the luminaire
- Color temperature: 5,000 K
- Surrounding temperature: -25°C to +40°C

- Protection class 2
- Protection rating: IP65

→ 216 LEDs for homogeneous 360° lighting exposure
→ Low energy costs
→ Weather-resistant, durable, long lifespan

→ Excellent heat management with large number of cooling ribs
→ High availability
→ LED modules and drivers replaceable individually
→ Daylight-similar
→ Use also in the case of high temperature fluctuations indoors and outdoors

→ Dustproof and water-jet-proof

Scope of delivery: 1 N8LED post-top luminaire, 1 post-top mounting (depending on model with pole tube), 1 strain-relief sphere, 1 attachment set

– other models on request / subject to modifications and errors –

ELSPRO N8LED 2.0
LED POST-TOP LUMINAIRE

CE ◈ ⚠ ⚠ ▣

Mast attachment of plastic powder-coated aluminum

- The power supply cable is channeled through the post
- It is secured by a strain-relief sphere
- Attachment takes places via an attachmnet box
- From the attachment box, the power supply for the luminaire is provided via a pre-assembled cable with plug and socket device with fastening bolt

- Three-sided fastening with 6 V2A bolts M8
- The attachment is for a mast diameter of 86 mm
- The diameter is reduced in the case of corresponding post tubes to 76 mm or 60 mm
- Other diameters on request

ALFLED DS
ELSPRO LED-Wire Rope Lamp

VERSION:

Voltage	Power	Lumen	Orientation	Dimensions in mm (D x W x H)	Weight	Illuminant	Order no.
220 - 240 V AC 50 / 60 Hz	52 W	6,500	0°	843 x 160 x 300	6.50 kg	LED panel	**7S235260**
			90°	500 x 843 x 300	6.50 kg		**7S23526090**
	104 W	12,810	0°	843 x 330 x 300	8.80 kg		**7S2310460**
			90°	500 x 843 x 300	8.80 kg		**7S231046090**

SPECIAL FEATURES:

- Colour temperature: 5,000 Kelvin
- LED boards under plastic lenses with an angle of emission of 60°.
- IP 67
- Suspension system made of stainless steel V2A
- Rope support with 2-fold clamp and additional fall protection including carabineer hook
- The inclination of the lighting unit on the suspension rail can be adjusted by +/- 15°
- Tilting of the ALFLED on the mounting bracket possible by +/- 45°
- Cable entry and exit (M25) on the left and right side of the connection box with cable diameter of 13-18 mm
- Connection of ALFLED and junction box using angled connectors

→ Daylight white
→ Focused light

→ Dust- and waterproof
→ Weatherproof
→ Hang in, clamp, secure, secure, done

→ Compensation of the lowering of the wire rope possible
→ Optimal alignment of the light beam

→ Connection box easy to install outside the lamp

→ Individual lamps can be disconnected without interrupting the power supply to other lamps in the series

Model turned 90° to the right

Alignment of the lamp at the mounting brackets and also possible on the suspension rail

– Other versions on request / Subject to alterations and errors –

SPECIAL FEATURES:

- dimensions (WxHxD): 280 x 360 x 130 mm
- limited weight
- LED panel with highly efficient SMD LEDs

- housing made of impact-resistant polycarbonate, edge protector of soft, thermoplastic elastomer
- handle made of impact-resistant ABS with 6 locking positions for positioning
- incl. robust switch on the lamp
- low heat development

→ limited space required, flat and compact form

→ easy and trouble-free handling while in use

→ LED panel with high light output, 6,450 lm, with low energy consumption, COST SAVINGS

→ strongly suitable for mobile use on building and construction sites

→ simple to transport, can be set up versatilely and in all situations

→ can be switched on and off directly at the workplace

→ no burns when touched, SAFETY

– other cable lengths and models on request / subject to modification and errors –

CONFIGURATIONS:

Voltage	Power	Light source	Luminous flux	Colour	Dimensions in cm	Weight	Order no.
100-240 V AC 50/60 Hz	100 W	High-Power-COB LED	10.000 - 2.000 lm	blue-black	H = 27,7 W = 24,4 D = 8,5	4,3 kg	**QVL100/5**

SPECIAL FEATURES:

- Robust powder-coated die-cast aluminium housing with rubberised edge and lens protection
- Small space requirement due to compact design
- Easy to transport thanks to rubberised carrying handle
- 5-level dimming function (10,000 / 8,000 / 6,000 / 4,000 / 2,000 lm)
- Light output display (10,000 - 2,000 lm) on the back of the light
- A continuously adjustable 180° swivelling base allows for a variable alignment of the light beam (Fig. 1)
- 120° beam angle for uniform area illumination
- with brightness memory function
- Fluorescent reflector integrated into the lens makes it easier to find the light in the dark (Fig. 2)
- Integrated USB port (output 5V 1A) for charging mobile devices (Fig. 3)
- Protection class IP 67 - dust and waterproof
- Impact resistance IK 07 - impact-resistant and resistant to mechanical stress
- Base prepared for mounting the ELSPRO base holder with DIN pin receptacle Ø 30 mm (Order No. TV001/4) for tripod mounting of the light
- Supply cable with plug: 5m INDUSTRIEFLEX 05 3G1.0 mm² - Copper class 6: ultra-fine stranded and therefore highly flexible

- 110 V DC on request -

SPECIAL FEATURES:

- serial connection of the lamps in many variations, e.g., with connector system or fixed connections between the individual lamps, distance and number as required

- connection with cable cross-sections of up to max. 14 mm are possible

- high-performance LEDs with an illumination angle of 120°

- colour temperature 6.500 K

- polycarbonate housing

- rustproof, stable suspension bracket

- satined Makrolon cover

- NXN with emergency situation system

→ optimal SOLUTIONS according to place of use and lighting needs are planned and produced

→ impermissible drops in voltage are avoided; long series of lights with one power feed SAVE labor costs and materials

→ homogeneous lighting

→ similar to daylight

→ fall- and impact-resistant

→ shock- and impact-resistant, with practical threaded closure

→ 60 minutes battery powered lighting during power interruption, disengageable by using magnet (delivery includes magnet)

Radiant beauty...

Designed for the illumination of all construction and assembly sites in industry and trade, for rescue and emergency services, for control missions, army and events.

- High availability due to individually driven LED modules
- Modular design, LED modules and drivers individually interchangeable
- Directly after switching on, full power and large-area uniform illumination
- Lighter and quicker assembly of the lighting unit
- Tool-free assembly and disassembly due to captive safety spring-loaded plug and scraper ring
- with intelligent temperature management
N8LED 2.1:

Voltage	BLUE RAL5002	RED RAL3024	ANTHRACITE DB703

- on/off rocker switch with protective cap in grip
- cable entry with cable screw connection and anti-bend spiral
- flexible metal tube, chromium-plated
- aluminum lamp head, 1-part
- light toward the front via a polycarbonate plate, with 45° chamfer for lateral light

→ lies firmly and secure in the hand
→ can be switched on and off directly on the lamp

→ wire breakage eliminated as far as possible, few repairs
→ enables illumination of difficult-to-access places
→ no wear and tear, no corrosion
→ enables glare-free work with optimal light output

Uses:
- quality control
- final inspections
- repairs
- trouble-shooting
- production
- installation and assembly

FIELDS OF USE:

everywhere in industry where illumination with conventional handheld lamps is not possible due to small openings

- cables INDUSTRIEFLEX® 07 HT -

SPECIAL FEATURES:

- IP55 - jet-water and dust-proof
- protective tube of polycarbonate 1,5 mm wall thickness, shock resistance IK10
- solid rubber grip and solid rubber end cap with suspension bracket of stainless steel V2A
- the MID-POWER LEDs emit a concentrated white wide-area light
- very low heat development
- the LEDs are vibration-resistant and have an expected service life of up to 50,000 hours
- low energy consumption, means small transformers with low output in the case of operating voltages of 24 V and 42 V
- an integrated electronic power supply unit continuously provides the LEDs in DC operation with constant current

→ SAFETY also when used in wet areas

→ long service life, even when subjected to mechanical strain

→ the lamp lies slip-resistant and secure in the hand, can also be hung up draft-proof

→ ideal for illuminating at close range, e.g., in the case of inspections, repairs and final inspections

→ no danger of injury resulting from burns in the case of direct physical proximity or even contact with the lamp

→ sudden total loss of all diodes is virtually excluded. Light does not shut off completely even at the end of service life. This characteristic means a great degree of operating safety

→ the transformers are light, easy to handle, and cost-effective

→ this assures an extremely long service life with optimal light output

FEATURES AND QUALITIES:

- high-quality hard-shell diffusion filter already mounted in the factory
- produces homogeneous light
- simple snap-on mounting on support rail
- filter mounting/dismounting without tools
- conversion of the light to direct lighting by removing the filter

- other models on request / subject to modification and errors -

with hard-shell diffusion filter

ELSPRO®

ELSPRO Working Light Type QV LED 28 Rechargeable

CE

The QV LED 28 Rechargeable is the robust panel luminary for mobile power-network-independent use.

SPECIAL FEATURES:

- Housing made of shockproof polycarbonate
- Edge guard made of soft, thermoplastic elastomer
- Handle made of shockproof ABS with 10 indexed positions for alignment
- Robust 2-step switch for 50 and 100 % light power
- LED panel with high light power rating: 4.500 Lumen at 100 % light power, 2.300 Lumen at 50 %
- Low heat generation
- Small space requirement due to flat and compact design
- Easy to transport; ca be set up versatility and in many different positions
- Splashproof
- Delivery includes fast charger 230 V (QVLA01)
MODELS:

Type	Illuminant	Lumen LED Panel	Lighting Duration*	Battery	Charging Time	Colour	Dimensions in cm	Weight incl. Battery	Order No.

ELSPRO
ELSPRO Battery Work Light QV LED Battery 60

The QV LED Battery 60 is a robust high-performance work light for battery or mains operation.

FEATURES AND PROPERTIES:

- Robust powder-coated die-cast aluminium housing with rubberised edge and lens protection
- Small space requirement due to compact design
- Easy to transport thanks to rubberised carrying handle
- Display for charge status (100 - 10%) and light output (6,000 - 1,200 lm) on the back of the light
- 5-level dimming function (6,000 / 4,800 / 3,600 / 2,400 / 1,200 lm)
- Hybrid system: battery or mains operation possible
- integrated proximity sensor detects obstacles and switches the light off automatically → increased safety (Fig. 1)
- integrated power bank function (output 5V 1A) for charging mobile devices - Capacity 6,000 mAh (Fig. 2)
- Protection class IP 67 - dust and waterproof (Fig 3)
- Impact resistance IK 07 - impact-resistant and resistant to mechanical stress
- A continuously adjustable 180° swivelling base allows for a variable alignment of the light beam (Fig. 4)
- Base prepared for mounting the ELSPRO base holder with DIN pin receptacle Ø 30 mm (Order No. TV001/5) for tripod mounting of the light
- 120° beam angle for uniform area illumination
- Low charge warning by flashing
- with brightness memory function
- Fluorescent reflector integrated into the lens makes it easier to find the light in the dark (Fig. 5)
- Supplied including 230 V AC charging unit with 5 m mains cable type H05RN-F (Fig. 6)
Fig. 1

* You can find other suitable stands in tab 13 (LIGHT catalogue)

- Other configurations on request / Subject to changes and errors -

The QV LED Akku 20 is a very handy and lightweight high-performance work light for mobile, off-grid use.

FEATURES AND PROPERTIES:

- Robust powder-coated die-cast aluminium housing with rubberised edge and lens protection
- small footprint and easy to transport thanks to lightweight and compact design
- Display for charge status (100 - 20%) and light output (2,000 - 400 lm) on the back of the light
- 5-level dimming function (2,000 / 1,600 / 1,200 / 800 / 400 lm)
- Integrated power bank function (output 5V 1A) for charging mobile devices - Capacity 6,000 mAh (Fig. 1)
- Protection class IP 67 - dust and waterproof
- Impact resistance IK 07 - impact-resistant and resistant to mechanical stress
- 180° swivel base incl. 2 magnets allows variable alignment of the light beam (Fig. 2)
- 7 position locking stand for positioning incl. ¼" thread for tripod mounting
- 120° beam angle for uniform area illumination
- Low charge warning by flashing
- with brightness memory function
- Fluorescent reflector integrated into the lens makes it easier to find the light in the dark (Fig. 3)
- Delivery includes 230 V AC charging unit

AUSFÜHRUNGEN:

ELSPRO rechargeable work light QV LED rechargeable 360°

The QV LED rechargeable 360° is a handy and robust cordless work light with a wide range of applications. With innovative lighting and sensor technology, it offers maximum flexibility and safety.

FEATURES AND PROPERTIES:

Two light sources
- Floodlight with 120° beam angle for even, uniform illumination of large areas
- Spotlight with a range of up to 250 m for selective illumination
- continuously dimmable (100% - 10%)
- attachable diffuser for all-round, glare-free working light
- Brightness memory function
- SOS function

Construction and operation
- robust plastic powder-coated die-cast aluminium housing with lens protection
- compact design: small footprint, easy to transport
- 360° continuously rotatable lamp head (Fig. 1)
- 180° continuously adjustable swivel base with ⅜-inch thread for tripod mounting (Fig. 2)
- Hook with spring clip for flexible attachment, belt function and groove for hanging on nails (Fig. 3)
- Stand with integrated magnets – also suitable for curved, metallic surfaces (Fig. 4)

Robustness
- Protection class IP 65 – dustproof and water jet-proof
- Impact resistance rating IK 07 – shock-resistant and resistant to mechanical stress
- Ambient temperature -10°C to +40°C

Scope of delivery
- Battery, USB-C charging cable and clip-on diffuser

ELSPRO rechargeable work light PROLED 4.0

$C\,E$

The ELSPRO EPL40 is a multi-functional battery-powered light designed for a wide range of applications.

The EPL40 can be used as a hand-held work light with a COB LED and a light output of up to 350 lumens or as a handy torch with an additional HighPower LED on the top with 100 lumens. The front COB LED can be adjusted continuously between 10% and 100%.

Thanks to its flat design, the EPL40 can also be used horizontally, for example for inspection work. The magnetic base and the adjustable suspension hook with a stand function allow for a variable alignment of the light beam.

The light can be recharged in 2-3 hours via a USB-C port and be ready for the next working day

FEATURES AND PROPERTIES:

- Compact aluminium housing with rubberised surface around the lens for additional protection
- Protection type IP 54
- High-power COB LED 4 W and high-power LED SMD 3030 1 W for various applications
- multifunctional switch: continuously adjustable work light or flashlight function with longer battery life
- with brightness memory function
- integrated fluorescence reflector in both lenses facilitates finding the light in the dark.
- Low charge warning by flashing
- environmentally friendly and long-lasting Li-Polymer battery
- easy charging via USB-C interface, with integrated charging indicator
- delivery includes rechargeable battery and USB-C charging cable

CONFIGURATIONS:

ELSPRO ULTRA LED USB-C cordless handheld light

CE

The ELSPRO ULTRA LED is a high-quality USB C cordless handheld light for flexible use. Five different light modes enable the user to efficiently adjust the ULTRA LED to the conditions at the place of use and individual lighting needs. With a light output of up to 12,000 lumens, the ULTRA LED is ultra bright!

FEATURES AND PROPERTIES:

- Anodized aluminium housing with rubberised protective rings
- 5 selectable light modes: 300 lm (low), 3,000 lm (medium), 7,000 lm (high), 12,000 lm (boost) and strobe mode (12,000 lm)
- Focusable light cone: continuous adjustment to spot or floodlight by turning the lamp head (lighting distance up to 200 m)
- Side multifunctional switch: 5 level adjustable light intensity, mode change, charge status display
- Low charge warning (< 25 min) via orange LED on the side
- Light colour 6,000K / Colour rendering index CRI 80
- Protection class IP 65 - dust-tight and jet-proof
- Shock resistance IK 07 - impact-resistant and durable
- Integrated power bank function (output 5V 1A) - capacity 5,000 mAh USB A
- Easy charging via USB C port
- Delivery includes battery and USB C charging cable

ELSPRO FOCUS LED 3.0 USB cordless handheld light

CE
The ELSPRO FOCUS LED 3.0 is a high-quality USB cordless handheld light for everyday use. The robust housing, made of T6 aircraft aluminium, the focusing system and powerful LED make the FOKUS LED 3.0 an ideal companion for quick use.

The handheld light is charged via a micro USB connection. The sophisticated design makes it possible to use the battery as a power bank. A flashing blue LED on the right side of the USB-C connection indicates the battery is charging. A red LED on the side indicates the battery level is low.

The ELSPRO FOCUS LED 3.0 can also be used as a battery-operated light with a battery holder and 3 size AAA alkaline batteries.

FEATURES AND PROPERTIES:

- Compact housing made of anodised T6 aircraft aluminium
- Protection type IP 54
- Light beam can be focused
- High light output
- Environmentally-friendly, long-lasting Li-ion battery
- Battery can be used as power bank 2200 mAh USB-C
- Multifunctional switch on the end cap for the settings: 100% / 40% / 10% / SOS function / strobe effect, with magnet
- Warning at low battery charge (< 30 min) via red LED on the side
- Scope of delivery: USB-C charging cable, power bank, battery holder without batteries, belt holster, hand loop

ATEX - Approved Lights

ELSPRO MULTI POWER rechargeable work light

The ELSPRO **MULTI POWER** explosion-proof battery-powered work light has been specially developed for use in potentially explosive areas and, thanks to its sophisticated design, offers a reliable and immediately ready-to-use lighting solution.

Within seconds, the light head can be extended to a height of up to 2.15 m using the integrated 5-piece aluminium telescopic pole.

With four lighting modes up to 5,500 lumens, one-touch switching and a swivelling and tilting lamp head, the lighting can be individually adjusted to the requirements on site.

FEATURES AND PROPERTIES:

- explosion-proof:

  ⟨Ex⟩ II 2 G Ex eb ib mb IIC T4 Gb

  ⟨Ex⟩ II 2 D Ex tb IIIC T130°C Db

  Gas Zone 1, 2

  Dust Zone 21, 22

- robust, antistatic housing made of corrosion-resistant and lightweight nylon with non-slip silicone rubber base

- Protection class IP 67 - dust and waterproof

- four different light modes: flood, spot, combined, economy mode (light colour 6,500 K)

- fold-out feet with a snap-in mechanism ensure that the lamp stands securely

- Ambient temperature: -20°C to 55°C

- The lamp head can be adjusted vertically by 115° (Fig. 1) and horizontally by 300° (Fig. 2) to the desired lighting angle

- 4-stage battery status indicator (25% each) and low battery capacity warning (Fig. 3)

- Multifunction switch made of robust, wear-resistant and chemical-resistant high-performance nylon (Fig. 4)

- The large switch makes it easier to switch between light modes, even when wearing gloves.

- built-in chemical-resistant and fatigue-free spiral cable

- integrated protection against overcharging, discharging, overheating, short circuit

- Battery life: 500 full charge cycles, LED life: 100,000 hours

- low self-discharge rate of the battery

- Delivery includes 230 V AC charging unit and practical, removable shoulder strap

ELSPRO MULTI POWER rechargeable work light

Mobile luminosity that sets standards:

From a distance of 40 metres to the 20-metre-high dam wall, the MULTI POWER impressively demonstrates its light output of 5,500 lumens. The focused spot beam is clearly visible at the centre of the wall. Meanwhile, the wide light cone evenly illuminates the entire surface of the dam and the surrounding area. A person shown in the image serves as a reference, clearly illustrating the enormous illumination area and intensity of this portable rechargeable explosion-proof work light.

ELSPRO Rechargeable Work Lamp WORKLITE MINI LYWL-50

⟨Ex⟩ C E

The ELSPRO work lamp WORKLITE MINI LYWL-50 was developed for use in extreme working environments and provides users with working light for many hours independent of power supply.
The WORKLITE MINI LYWL-50 is gas explosion-proof for zones 1 and 2 and dust explosion-proof for zones 21 and 22.

The high-power LEDs provide a concentrated area light, while at the same time providing excellent ambient lighting. Lighting duration in high-power operation is 5 hours. If the user wishes to operate the device in economy mode, the lighting duration per battery charge is increased to 10 hours!

FEATURES AND CHARACTERISTICS: :

The rechargeable hand lamp type LYH-251ALED complies with the provisions of the 94/9/EC directive for potentially explosive atmospheres.

Equipped with a high-power LED, the LYH-251ALED produces a penetrating beam of light with a far-reaching spot and achieves an extremely long light duration of 24 hours per battery charge.

Due to its technical characteristics, the LYH-251ALED is the ideal battery-operated hand lamp for use by fire brigades and in industrial areas with high demands in terms of explosion protection.

FEATURES AND CHARACTERISTICS:

- ⟨Ex⟩ II 2GD Ex ib IIC T4 Gb (-10°C ≤ Ta ≤ +40°C)

ELSPRO Rechargeable Hand Lamp WOLFLITE XT

⟨Ex⟩ CE

Due to their technical characteristics, WOLFLITE XT battery hand lamps are excellently suited for use in industrial areas with high demands regarding explosion protection. All three types feature high-power LEDs and can be used either in normal operation or in economy mode, which doubles the operating time per battery charge. A display integrated in the lamp housing informs the user about the current charge or battery status.

FEATURES AND CHARACTERISTICS:

05.19

The rechargeable hand lamp LYR is a perfectly thought-out lamp. Designed for use in potentially explosive areas, it also has a power failure monitor: the LYR hand lamp is hooked into the charger when switched on. As soon as the charging process starts, the light goes out. A sudden power failure causes the battery light in the charger cradle to switch on automatically.

The practical charger cradle enables the lamp to be grasped quickly, even when wearing thick gloves (one-hand technique).

The sturdy clip on the lamp head allows the LYR to be securely attached to belts, clothing, belts, etc. You can use the lamp while working, as both hands remain free!

FEATURES AND CHARACTERISTICS:

- Protection class IP 67 - dust and waterproof
- Permissible ambient temperature: -40 °C and +40 °C
- Maximum surface temperature: 200 °C
- Robust, skid-resistant lamp housing made of anti-static thermoplastic, 90° angled lamp head
- With high-power LED
- Additional protection against impact by rubber rings on lamp head and end cap
- Adjustable economy mode by double switch actuation
- Charging options: at 230 V AC und 12 V / 24 V DC
- Charge status display via LED technology
- **LYR-50:** $\langle Ex \rangle$ I M2/II 2GD Ex ib op is I Mb/IIC T4 Gb (-40°C<Ta<+40°C) Ex ib op is IIIB T200°C Db IP67 gas zone 1, 2 / dust zone 21,22

ELSPRO Battery Hand Lamps LYT with LED

⟨Ex⟩ CE

The heavy-duty hand lamps of the LYT series are especially suitable for use in hazardous areas.

In contrast to the LYTS models, all LYTR versions have a 90° angled lamp head and a sturdy carrying clip so they can be easily attached to a belt or other garments. This ensures good lighting conditions and at the same time free hands when working.

FEATURES AND CHARACTERISTICS:

- Dust and waterproof
  Protection class IP67: models LYT-30+ and LYT-35+
  Protection class IP66/67: models LYT-60 and LYT-65
- Wear-resistant, antistatic thermoplastic housing
- Tempered glass lens; LYT-60: polycarbonate lens
- LYT-65: 3 selectable light modes
- Red signal LED indicates low battery power
  (with the exception of model LYT-60)

ELSPRO LYM-70 battery-operated light

⟨Ex⟩ CE

Small, but mighty: The robust, compact LYM-70 compact mini battery light can easily be stored in a pocket. Despite its small format, it achieves impressive lighting performance of 107 lumens thanks to modern LED technology.

According to its approval code, the LYM-70 is ATEX certified for safe use in potentially explosive gas, vapour, mist and dust atmospheres. It is also approved for use in mining operations according to group I.

FEATURES AND PROPERTIES:

- Wear-resistant, non-conductive thermoplastic housing with scratch-resistant polycarbonate lens

- Protection class IP 67 – protected against the ingress of dust and water

- State-of-the-art LED technology

- Practical end cap switch for momentary and continuous operation

- Robust clip for attaching the light to clothing, for example

- Explosion-protected, lightweight handheld light for flexible use according to the following approval codes:

QUALITY GUARANTEED

Our products reflect the current state of technology and conform to German and European norms.
We are certified according to the standard DIN EN ISO 9001.

ELSPRO = ELECTROTECHNICAL SAFETY PRODUCTS

Since the company was founded in April 1986, safety and personal protection when dealing with electrotechnical equipment has always been the primary focus for ELSPRO.

Reliable, flexible and service-orientated – our focus is on long-term cooperation

ELSPRO products offer you maximum safety in the professional distribution of light and electricity.
The implementation of your product requirements are always based on state-of-the-art technologies while being compliant with the latest directives.

We offer „technology without compromise", are happy to advise you and develop tailor-made solutions for you.

Creative, customer-orientated and close to the market – we grow with your requirements

Constant training and consistent product development over many years form the basis of our extensive range of electrotechnical safety products. Innovative product solutions arise constantly from day-to-day business thanks to partnership-oriented cooperation between our qualified staff and discerning customers.

ELSPRO – Electrotechnology at the highest level

From our headquarter in Hilden, we supply the European market with high quality ELSPRO products. Individual consultancy and order-related production are a key part of our day-to-day business. Customer-orientated support is provided by an extensive network of regional offices and expert advice from our qualified field staff.

Upon request, your personal contact will be delighted to present products which may interest you at your premises.

On the safe side with ELSPRO

Together we investigate your individual requirements. Our departments will then work out dedicated electrotechnical product solutions of the highest safety standard, true to our motto „technology without compromise".

As a manufacturer, we offer you the following benefits:

- production to customer specifications
- on-site support by our technical field staff
- qualified contact persons in the head office
- detailed knowledge of the current regulations
